Coyote Hotline

I am receiving more and more complaints about coyotes damaging livestock or crops. In order for us to establish the degree of problems that we are having, a coyote hotline has been established.

If you have had coyote problems, I recommend that you call this number, particularly if the damage is still preserved. Based on the telephone conversation, a graduate student or technician may be sent out to look at your damage. The goal of this study is to determine the amount of damage that can actually be attributed to coyotes.

The toll free number is 1-800-392-5805.

Do You Know That...

*Birds, especially starlings, robins, blackbirds, feeding in gangs in turf areas may indicate the presence of insect pests. "Critic-digging", areas dug into by moles, armadillos, raccoons, skunks, etc., may indicate the presence of grubs or mole crickets.

*Insecticide treatments on turf are more effective if done late in the day; depending on the pest, from mid-afternoon to early evening.

*Pretreatment watering for grub, fire ant, and mole cricket may determine the effectiveness of the control. These soil insects are more active nearer the surface if moisture is present. Irrigation after treatment is determined by the product label.

*New fire ant mounds are not visible above the turf for the first few days or weeks.

*The younger stages of most turf pests are most easily controlled.

*Spot treatment for lawn insect pests is recommended rather than treating the whole thing.

*WHEN you treat is as important as WHAT you use to treat.

*Fire ant workers cannot eat solid foods; solids are digested by the last immature stage larvae and fed back to workers and queen. This is why once the queen is out of the picture, it takes several weeks for the colony to die out—no more queen, no more immatures, no more food for workers.

ers, so they starve.

*Grubs and mole crickets prefer the same areas year after year. Reinfestations occur in areas where spring heat and moist favor egg hatch. In new areas, slopes with southern (or southeaster) exposures are most preferred.

*Green June beetle grubs crawl on their backs with legs in the air! These large grubs are easy to kill but hard to control; because of their mobility, reinfestation can occur within a season. Flooding areas with water may cause these grubs to surface; they can then be removed by hand.

*Big-eyed bugs are predators that are often mistaken for chinch bugs. Big-eyed bugs resemble chinch bugs in shape but have bulging eyes and lack the black triangle about midway on the outer edge of the top wings. Big-eyed bugs are important in controlling small caterpillars and chinch bugs in turf and are among our most important predators in crops.

Each year young people from all across Coffee County participate in the Coffee County 4-H Livestock Judging Contest. Many also participate in the 4-H Meat Judging Contest. The Meat Judging Contest is yet to come, but we recently had the District 4-H Livestock Judging in Wetumpka. There are three districts across the state, and the one for the Wiregrass includes counties as far north as Chambers County to as far south as Houston County. There are two divisions: Junior Division (14 years old and younger) and Senior Division (those over 14 years old).

We had 14 kids participating in the contest this year. They were Amanda Britt of Enterprise, Jenny Patterson of Kinston, Matthew Farris of Elba, Jeremy Bryan of Kinston, Shanna Ballard of Kinston, Joe Ballard of Kinston, Leigh Kelley of New Brockton, Matt Windham of New Brockton, Emily Bryan of Zion

FFA CITATION...The Elba High School FFA Chapter received a State Bronze Award and was cited for its outstanding achievements in the Build-FFA Convention held in Montgomery.

Shown displaying the award is chapter representative Brent Goodson and FFA advisor Mike Harrellson.

Livestock Judging Wins Big At District

Stan Windham - County Agent

Chapel, Bo Boyd of New Brockton, Charles Bozeman of Elba, Reggie Britt of Enterprise, and Beverly Flowers of Zion Chapel.

Each child is eligible for individual awards and there are also team awards. The team can consist of three to four people. If you have four people on a team, you are allowed to drop the lowest score. Coffee County had three junior teams, and they placed first, third and fourth.

Those winning individual awards in the Junior Division in swine judging were Emily Bryan as high individual and Matthew Farris as second high individual. In the Junior Division in beef judging Matthew Farris was high individual, Jenny Patterson was second high individual, and Amanda Britt was third high individual. In the overall awards, Emily Bryan was high individual in the

Junior Division with 364 points out of 400, and Matthew Farris was second high individual with 359 points out of 400.

In the Senior Division, Charles Bozeman was third high individual in swine judging and he was third high individual overall. In the team competition, Coffee County placed second. They will be eligible to compete in the state contest to be held the third week in July at Auburn University.

We are very proud of all of these 4-Hers and the hard work and dedication that they exhibit each year. The parents were a super group to work with. Without them, the program would not be possible. They bring their children twice a week to practice, and many of them go with to the district competition and be a part of what is going on in their kid's life. To be honest, that may be the most important part of this whole program.

If you are interested in your young person getting involved in something that is positive and can help them later on in life, something they can not only do through the high school years but there are also college teams, we will be more than glad to get them involved. Give us a call at 894-5596.

For the 4-H Pumpkin Contest, 4-Hers will need to bring their pumpkin in to the Extension Office to be weighed whenever they get ripe. The deadline for this contest will be Thursday, October 29, at 4:00 p.m.

I would like to remind you that the Peanut Festival also has a large pumpkin contest. The first place prize for the largest pumpkin entered

is \$100 in cash. It may be worth your trying to grow a pumpkin for that event also.

There are two 800 numbers that I think peanut growers will be interested in.

The first number is the Alabama-Florida Peanut Hotline, a service of Dow Elanco, makers of Balan, Sonolan, Loraban 15G, and Tolene. Their number is 1-800-422-8845.

The second 800 number is the National Water Service Radio, an AUPNCT Hotline. It is 1-800-584-8595 for Southeast Alabama. It will start each day with a new weather forecast at 5:00 p.m. The broadcast will include both the five-day average and an individual forecast for each day. It may be helpful to check the forecast in the evening as you plan for your next day's activities.

Webb met with the city council Monday evening and explained his efforts to date and for the future. He explained it was cost prohibitive for Elba to enter the project alone and even more impossible for the balance of Coffee County residents.

He added there was also some interest as late as Monday on purchase of the old Superintendent's office. However, Moore urged the council to consider public use before offering this property for sale. He noted it would be ideal for a Chamber of Commerce and/or a visitors information center.

Some rural mailboxes deem safety hazard by state

The agenda for Monday's Coffee County Commission meeting had only two items listed and it appeared the meeting would be brief. This turned out to be wrong. The meeting was a rather lengthy one lasting two hours.

Once again a discussion about the proposed landfill - type, location and construction - consumed much of the meeting time. The end result was the same as it has been in the past.

Several of the commissioners state that by seeking a regional Subtitle "D" landfill permit it gives the commission one more option in dealing with the disposal of the county's solid waste.

The commission also feels that by obtaining the permit, it provides them with a bargaining tool. This would be useful should they choose to negotiate a contract with a private contractor to haul the county's garbage elsewhere.

Mark Pugh, an engineer with Carter, Darnell and Grubbs, presented an overview of what has been done concerning the proposed landfill.

He stated that the search for a suitable site to construct a landfill was begun in 1989. This was done after the commission discovered that by October of 1993, all solid waste will have to be deposited in a Subtitle "D" landfill.

"After advertising in local newspapers for land, 137 sites were under consideration. This number was narrowed to 19 and then finally to 4 sites.

The process for elimination of sites was based on several things:

pers for land, 137 sites were under consideration. This number was narrowed to 19 and then finally to 4 sites.

Fruits And Vegetables Were Main Part Of Elba's Farmers Market

Richard Petcher-Associate County Agent

Elba Farmers Market

A big part of the Elba Farmers Market was a Fruit and Vegetable Produce Contest. The winners were as follows:

Watermelons - Thomas Cauley - first place; Kevin Hobbs - second place.

Cantaloupes - Thomas Cauley - first place; Earl McCollough - second place.

Peaches - Ralph Sharpless - first place.

Tomatoes - Gerald L. Hartley (Liberty) - first place; Gerald L. Hartley (Roma) - second place.

Lima Beans - Kevin Hobbs - first place.

Green Beans - Earl McCollough - first place.

Corn - Ronnie Powell - first place; Grover Fillingim - second place.

Okra - Mike Thomas - first place; Thomas Cauley - second place.

Squash - Thomas Cauley - first place; Grover Fillingim - second place.

Field Peas - Kevin Hobbs - first place; Aubrey Cauley - second place.

4-H Watermelons

Each year we have a 4-H Watermelon Contest for the largest watermelon grown in Coffee County. Watermelons are truly one of the greatest crops in the south.

I would like to see our youth participate in this contest. Any 4-H'er can enter simply by bringing your watermelon by the Extension Office and having it weighed. The final date of the weighing will be Monday, July 27, at 4:00 p.m.

4-H Pumpkin Contest

It is time to be planting your pumpkins now for the fall crop. Pumpkins are easy to grow except for the fact that in August the insect population is so high here it is difficult to keep them from getting eaten up by bugs.

For the 4-H Pumpkin Contest you will want to plant one of the mammoth pumpkin varieties. If you are looking for Jack-O-Lanterns or pie pumpkins, the Connecticut field pumpkins yields the best, but almost any variety of pumpkin will grow well.

You need to be very careful as the ammonia in chicken litter can kill fish. In the early spring and late fall, use only 100 pounds of chicken litter for the fact that in August the insect population is so high here it is difficult to keep them from getting eaten up by bugs.

For the 4-H Pumpkin Contest, 4-Hers will need to bring their pumpkin in to the Extension Office to be weighed whenever they get ripe. The deadline for this contest will be Thursday, October 29, at 4:00 p.m.

I would like to remind you that the Peanut Festival also has a large pumpkin contest. The first place prize for the largest pumpkin entered

is \$100 in cash. It may be worth your trying to grow a pumpkin for that event also.

There are two 800 numbers that I think peanut growers will be interested in.

INTEREST EXPRESSED IN OLD ELEMENTARY SCHOOL BUILDING

City favors planning for countywide E-911

by Ferrin Cox

Publisher

The July 13th meeting of the Elba City Council opened on a sober moment as Mayor Fred Moore noted the tragic death of city employee Kenny Ware earlier in the day. The opening prayer by Councilmember John Sharpless also remembered Ware and his family.

The Elba City Council unanimously endorsed plans by Coffee County Emergency Management Director Charles Webb to work toward a countywide E-911 emergency telephone system.

Webb met with the city council Monday evening and explained his efforts to date and for the future. He explained it was cost prohibitive for Elba to enter the project alone and even more impossible for the balance of Coffee County residents.

He added there was also some interest as late as Monday on purchase of the old Superintendent's office. However, Moore urged the council to consider public use before offering this property for sale. He noted it would be ideal for a Chamber of Commerce and/or a visitors information center.

WHILE TRIMMING TREE LIMBS

Utility worker dies Monday from electrocution

BY Ferrin Cox

Publisher

Kenneth Ware, age 56, was killed Monday morning while working with Elba utility crews trimming tree limbs away from high voltage power lines.

According to reports, Ware was in the insulated bucket truck, along with co-worker Ed Compton at the time of the accident.

Compton was using the saw, while Ware moved the bucket. The uninsulated boom of the equipment touched a hot wire and Ware apparently panicked. They were only eight to ten feet above ground and he jumped from the bucket, in spite of Compton's efforts to get the man to remain

the safety of the insulated bucket. When Ware hit the ground he either fell into or rolled into the non-insulated truck - and was electrocuted instantly before anyone could stop the 7200 volts

BRAINSTORMS

With Ferrin Cox

Charles Hollis once owned a piece of land South of Dothan, right at the Florida line. There was a beautiful growth of timber on the property and we thought a home near the lake he constructed would be paradise. Anyway, he cut the marketable timber and sold the property. The new owners cleared part of the land and early this spring, planted several acres in watermelons. We watched those melons grow in the "new ground" and dreamed of what tasty things they would be. We asked Charles if he had reserved any "sampling rights" and he admitted to forgetting to add this clause into the sales contract. Anyways we drove by there a couple of weeks ago and there were wagons and wagons of melons lined up around the field headed for market. The project was a success and we ain't got sampling rights!

Con artists are trying every day to find another way to part working folks and their money. A con we have read about for several months has been used successfully at least twice in this area recently. A person gets a phone call to wire money, by Western Union, to a family member, friend or employee who has been hurt in an accident. They do it, the money is picked up at any Western Union office in the nation, and there is no accident to begin with. Until the crooks are caught in the act, there is little we can do. We can call and ask money be sent. We can find some way to force positive identification of the person picking up the money, etc.

In one of the area cases we know of, a lawyer received the call that a vacationing employee had been in an accident in South Florida and needed \$300, having left credit card, etc. at home. He sent the money, which was picked up by the con artist in Grand Central Station, New York. The employee, hadn't reported back to work, but was already back home at the time this all happened. Another case involved a call to a father that his college student son had been in an accident. He sent the money, the son was in the dorm studying, but the money is gone.

Each of these cases involves intelligent people, so none of us need to assume we are to get caught by such a scam. Most of us are like the lawyer. He sent the \$300, even though he thought it strange his employee would get in that fix. He noted that if they had asked for something like \$1,000, he would have given him his car and driven to the place with the money, but \$300 wasn't a whole lot of money, just enough to make him feel stupid and very mad. But the money is gone and someone else is getting set up for the scam.

Even in this busy world we live in today, some people don't have anything constructive to do. During the past several days there has been a rash of destroying signs of political candidates. This bothers us, not that we have discovered some vandals, cause the world is full of those. Not that we think some of our political candidates are dropping to a low level. We just hate to see someone we know unmasked for their stupidity. First, any candidate who thinks this will help influence votes, isn't smart enough for the job anyway. Second, any supporter of a candidate with these same thoughts, probably is to stupid to even register as a voter, must less cast an intelligent vote. We can almost guarantee those doing this that they will be (have been) seen when they get more than one or two political signs and then everyone in town will know they fit in the group we described above. Again, we hate for the world to know this about some of our Elba folks.

BUCKLE UP IT IS THE LAW!!

State Of Alabama Personnel Department
The Alabama State Personnel Department this week announced examinations for filling present vacancies in the following positions:

- *Engineering Assistant III (\$17,761 - \$26,364)
- *Utility Laborer (\$12,886 - \$17,761)
- *Heating and Air Conditioning Technician I (\$17,761 - \$26,364)
- *Civil Engineer III (\$27,690 - \$41,964)

Full information and application forms may be obtained from the State Personnel Department at Montgomery or from any local office of the State Employment Service.

*These positions will remain open until further notice.
Applications will be accepted and appointments made on an equal opportunity, merit basis, without regard to sex, race or color.

DIED SAXOPHONIST OF ARKANSAS

AREA DEATHS

LAWRENCE AUGUSTUS FARRIS, SR.

Lawrence Augustus Farris, Sr., age 91 of Elba, Alabama, died Sunday, July 12, 1992 in an Opp, AL nursing home.

Funeral services were held at 3:00 p.m., Tuesday, July 14, 1992, in the Hayes Funeral Home Chapel with the Reverend Johnny Padulino and Elder R. A. Anderson officiating.

Burial followed in the New Home Cemetery, located near Elba, with Hayes Funeral Home directing. Survivors include his wife, Annie Farris of Elba, AL; two daughters, Sara Ellen Tyler of Montgomery, AL and Mary Ella Lewis of Dothan, AL; one son, Dr. Lawrence A. Farris, Jr. of Mobile, AL; one brother, Clyde M. Farris of Atlanta, Georgia; seven grandchildren; seven great grandchildren; two great great grandchildren.

JIM HAMILTON

Jim Hamilton, age 83 of New Brockton, Alabama, died Wednesday, July 8, 1992, in the home of his niece, Mrs. Thelma Makie, in the Shilo Community.

Graveside services were held at 9:30 a.m., Friday, July 10, 1992 from the Mt. Calvary Cemetery with the Rev. Freddie Hanchey, Virgil Coleman Mortuary directing.

Those discharged during the same period of time were: Janice Daugherty, Ervin Blackman, Jessie Bradley, Betty Driggers, Stephanie Adams, Billy Berry, Lillian Pynes, Verbie Herring, Ann Mae Daniels, Bonnie Johnson, Robbie Graham, Mary Edwards, Wynette Rhoades, Lucy Wise, Jeremy Johnson, and Keith Calhoun.

PAINTING SYMBOLS ON TEEPEE...Participants in the Elba City Library's Summer Reading Program are shown above painting symbols on an Indian teepee. The teepee was erected on the courthouse square in downtown Elba when it was completed. The youngsters have been reading about the wild, wild west during the summer and this was part of their extracurricular activities.

POLICE REPORT

The Elba Police Department, beginning Tuesday, July 7, 1992, investigated the following incidents: one interference with custody of a child, two assaults, one DUI, four thefts, two burglaries, one criminal mischief, one possession of marijuana, three harassments, two domestic violence, and one forgery.

Arrests made during the same period of time were as follows: thirteen for speeding, one for DUI, one for driving without a driver's license, four for driving while driver's license are suspended, two for criminal trespassing, one for harassment, one for driving on the wrong side of the road, one for leaving the scene of an accident, one for obstructing justice, one for reckless endangerment, one for menacing, one for running a stop sign, six for forgery and four for no driver's license.

Daily activity for the week was as follows:

TUESDAY, JULY 7 - Fight reported at the intersection of Reynolds and Jones Streets (6:33 p.m.); Routine activity.

WEDNESDAY, JULY 8 - Rescue run to residence on Drayton St. (12:45 a.m.); Routine activity.

THURSDAY, JULY 9 - Rescue run to residence on Payne St. (4:32 p.m.); Prowler reported on Stouderman St. (9:22 p.m.); Routine activity.

FRIDAY, JULY 10 - Alarm at SouthTrust Bank (6:13 a.m.); Alarm at The Peoples Bank (8:11 a.m.); Alarm at Al Smith's residence on Taylor Mill Road (8:11 p.m.); Disturbance at Little Beaver Trailer Ct. (9:36 p.m.).

SATURDAY, JULY 11 - Wreck on Farris St. (8:50 p.m.); Disturbance on Adams St. (9:45 p.m.); Prowler reported on Plant Ave. (9:58 p.m.).

SUNDAY, JULY 12 - Rescue run to residence on Smith Ave. (7:52 a.m.); Disturbance on Smith Ave. (11:14 a.m.); Alarm at SouthTrust Bank (5:21 p.m.); Alarm at Showtime (5:31 p.m.); Rescue run to residence on Plant Ave. (6:15 p.m.); Disturbance in Powell's Trailer Ct. (9:21 p.m.); Prowler reported at Mullins Apts. (11:10 p.m.).

MONDAY, JULY 13 - Burglary reported at Marsh Ins. (8:09 a.m.); Rescue run to electrical accident on Brantley Hwy. (9:19 a.m.); Fire units dispatched to electrical accident on Brantley Hwy. (9:19 a.m.); Alarm at Showtime (9:54 a.m.); Burglary on Pine Cove Dr. (4:22 p.m.); Subject reported with a gun (10:58 p.m.).

NOTICE

H.R.D.C. will distribute U.S.D.A. Surplus food on July 21, from 9:00 a.m. until 3:00 p.m. at the following locations: Enterprise Adult Recreation, Elba H.R.D.C. building behind Whisman Drug Co. and Kinston City Hall.

New Brockton Farm Center distribution will be July 23rd.

WARE

(Continued from Page One)

of electricity.

Compton remained in the bucket and reportedly used a rubber hammer to operate the controls and get lines out of the power lines. He did this to insure he was not also shocked if something had actually gone wrong with the insulation system.

The truck was later sidelined until it could be completely checked for damage from the accident or previous malfunction of protective equipment.

This type vehicle must routinely

be inspected and certified safe before it can be used around electrical lines. This truck had been certified as safe about two months ago by an outside qualified inspection firm.

Working with the tree trimming crew in addition to Ware and Compton were Julie Noble and Benny Walker. These two were on the ground, but couldn't get to a second set of controls on the truck, because they too would have been shocked.

For the same reasons, they couldn't touch Mr. Ware until Compton had

moved the boom away from the hot wire.

When they could safely move him, the two began amputating CPR. This was taken over by members of the Rescue Squad upon their arrival minutes later and continued while he was being transported to the hospital.

The medical staff at the hospital worked with Ware for over an hour before pronouncing him dead.

Funeral arrangements are being made by Virgil Coleman Mortuary.

CITY

(Continued from Page One)

"If we could do more for the Chamber, we could get more people involved with chamber activities," Moore said.

Moore asked Executive Director Gene Kennett to discuss this with the Chamber board and report back to the council.

Demolition of unsafe buildings in the old school complex was discussed by the council. Moore reported that the middle school building was unsafe and the vocational building was uneconomical to repair. He recommended getting more information of cost or profit from tearing the facilities down.

Councilmember John W. Sharp

less wanted to "wait and not tear down anything." He said someone might come along and want them.

Moore noted something needed to be done and the council agreed for him to proceed with getting cost and finding someone to tear them down if necessary.

The middle school building would be in the ten acres wanted by the unnamed purchaser of the elementary school. They are not interested in the building and Moore said ultimately remove it, Moore said.

The council voted to get two appraisals on the ten acres and for Moore to continue negotiations with

the interested parties.

Police Chief Freddie Hanchey reported the department had answered 251 complaints during the past two weeks. This includes four traffic accidents. There were 62 traffic citations issued, including six for DUI. During this period there were 22 criminal arrests.

The animal control officer impounded 23 dogs.

Bills totaling \$9,640.92 were reported for payment.

The council approved a resolution calling for the widening of 189 South (Kinston Highway). This includes a new bridge at Moore Creek (Two Mile Creek).

REPORT

(Continued from Page One)

intended Ed Compton were in a bucket truck about eight or ten feet above the ground, trimming tree limbs when the arm of the bucket touched a 7200 volt hot line. There were two other utility employees working with the tree trimming crew.

According to reports given to Galloway, Ware panicked and jumped from the insulated bucket in spite of Compton's verbal and physical efforts to restrain the man. Apparently when he landed on the ground, Ware rolled into the truck which is not insulated from the electric charge and was electrocuted.

After the accident, the truck was taken out of service until it could be recertified as safe. All employees on the tree trimming crew were sent

home for the remainder of the day. Galloway reported the department was also working to install electric service to the new water well; lines to the new schools were energized and the department was prepared to work with the Alabama Highway Department by moving lines in the way of several highway improvement projects. They must also build a new bank of transformers to serve the new public library now under construction in downtown Elba.

Dennis Coleman, superintendent of the water department reported the water projects were almost complete with the exception of the well repair work. A meeting was scheduled, he said, to get these projects completed.

Board members were told that the recent problem of blinking lights

was not unique to Elba. Other users of electric power from Alabama Electric Co-op are reportedly experiencing the same problems.

George Hanyak was authorized to join and participate with South Alabama Rural Electric Association.

A review of the financial condition of the utility department shows income is up overall. Electric sales and profit are up. However water profit is down, offsetting some of the electric profits.

Accounts Receivables total \$10,668.67. \$8,000 of this is in two accounts. Board members note one of these is being paid gradually and the other may become uncollectable. Monthly bills of \$11,088.45 were approved for payment.

SITE

(Continued from Page One)

acreage(200 or more), adjoining land use, access to site, soil samples (low permeable clay is desired), surface water runoff and runoff control, landfill gas management, and the safety of the landfill.

The site located on AL Hwy. 125 northeast of Elba was purchased by the county after completion of the selection process. The proposed landfill site is located between the Wise's Mill and Victoria Communities.

During the discussion in Monday's meeting, Ewell Griswold questioned the safety of the line to be used in the landfill. Pugh stated that no one can be assured of the absolute safety of any liner.

Pugh told the group, "If you're going to fight because of contamination near Whitewater Creek, you need to fight Waste Away over the site in Brundidge."

According to Pugh, Waste Away has a permit application in progress for a regional landfill at Brundidge, Mims Creek - a major tributary of Whitewater - flows directly through the proposed site.

Pugh stated that another reason the county considered a permit regional landfill was the cost factor. It will be expensive to operate a Subtitle landfill. By allowing other select counties to deposit their solid waste in the county's landfill, it would allow citizens to dispose of their garbage at a reduced rate.

Other matters addressed by the commission were as follows:

***Signed an agreement to send out bid request for the work to be done on the Headless Horseman Road.

***Reviewed a proposed new numbering system for all county roads. The new system would make it easier for emergency personnel such as fire, rescue and law enforcement agencies to locate residences or businesses where they might be needed.

***Considered a petition to re-open a connector road (dirt) between Co. Rd. 55 and AL Hwy. 134. Took no action.

***Agreed to transfer title on a low-boy trailer recently purchased for the Forestry Department. It was titled to the county in error.

***Agreed to allow Sheriff Brice Paul to enter into an agreement with the cities to house their prisoners at a cost of \$10 per day in the county jail.

***Agreed to send out bids for the spraying of the undergrowth at the proposed landfill site. This is to be done in preparation for planting pine trees on the portion of land that will not be used for the landfill. It is estimated that in 30 years, the trees will be worth \$300,000.00.

***Commissioner Robert Stephens appointed to look into getting pieces on a monument for the site of Coffee County's first courthouse at Wetburn.

***Commissioner John Dubose requested that it be determined as to where the Historical Society stands on the renovation of the old jail in Elba.

Commission Chairman Billy Eagon responded, "The ADC (Alabama Democratic Conference) apparently has filed suit against us again out of Montgomery. We will be looking at redistricting again. This commission has not agreed to do so."

Other matters addressed by the commission were as follows:

Miss Wambles To Marry Mr. Herring

Angelia Dawn Wambles, daughter of Larry and Emily Wambles and Jason Dewayne Herring, son of Jack and Peggy Herring, invite you to share in the joy when they exchange marriage vows and begin their new life together on Friday, the seventeenth of July, nineteen hundred and ninety-two, at six thirty in the evening at the home of Mr. and Mrs. Gene Herring, Sallito, Mississippi.

Lindsay Lee Hale Celebrates 1st Birthday

Lindsay Lee Haley was honored on her 1st birthday June 18th, with a pool party at Hawkins Williams Park. Those helping Lindsay celebrate were her parents, David and Cindy Haley, grandmothers, Peggy Creel and Dorothy Haley, aunts, Donna Haley, Leslie Creel, Joseph, Tonya, and Taylor Creel, Susan and Keli Tindol, Chad and Julie Tindol, Danny, Sami, Aaron, Brooks, and Colton Creel, Casey Kelley, Tracy and Haligh Moore, Betty Dewberry, Keith Granham, Ryan Gibbs. Everyone enjoyed refreshments and swimming. Lindsay received many nice gifts.

Lindsay Lee Haley

If you're not planning to grill electric just how are you planning to grill?

Sure, heat is heat. But, then again, food is food. And food knows the difference between two ways of cooking. For food that's perfectly prepared every time, use nothing less than the clean, even, controllable heat of electricity. Particularly when you're grilling.

After all, no other source of heat can compare with the convenience of electricity. Click it on, pure heat. No mess. No fuss. And no mysterious by-products of combustion. Who needs any of that swirling around the family dinner?

No doubt about it. For grilling outdoors or in, you can't beat electricity. It's marvellous.

Miss Crystal Carpenter Honored With Miscellaneous Bridal Shower

The lovely home of Mrs. Kathleen Williams was the setting for a miscellaneous bridal shower honoring Miss Crystal Carpenter, bride-elect, Tim Nelson, on Saturday, June 27, 1992.

The entrance door was adorned with white wedding bells. Mrs. Kathleen Williams and Mrs. Gloria Nelson greeted and directed the guests to the receiving line. Mrs. Jeanette Crook, mother of the bride, and Mrs. Maple Nelson, mother of the groom, received guests. The guests were then directed to the dining room and were served. The serving table was covered with mauve and overlaid with a white lace table cloth with white wedding bells hanging from the table and mauve bows.

Miss Mooney

Mooney - Beck Announce August Wedding Plans

Mr. and Mrs. James Wendell Mooney of Opp announce the engagement and forthcoming marriage of their daughter, Maryann Mooney, to Patrick Lynn Beck.

He is the son of Mr. and Mrs. A. L. Beck of Andalusia. The bride-elect is the granddaughter of Mr. and Mrs. J. B. Mooney of Opp; also the late Mr. and Mrs. Tom Mooney.

She is a 1988 graduate of Opp High School; she received an AA degree from Lurleen B. Wallace State Jr. College and a BA degree in Business Administration from Huntingdon College in Montgomery. She is currently employed with the accounting department at Huntingdon.

The prospective groom is the grandson of the late Mr. and Mrs. Ray Beck of Brantley; also the late Mr. and Mrs. Henry Clark of Elba. He attended Andalusia High School and later received an AAS in Forestry Technology from Lurleen B. Wallace State Jr. College.

He is employed with "The Out-house" in Montgomery. The wedding will be held at 4:00 p.m. on Saturday, August 29 at the First United Methodist Church in Opp. All friends and relatives are cordially invited to attend.

Students Earn Bachelors Degrees At Troy State University

PASTOR'S CORNER

Rev. Kenneth Finch
Elba First Assembly Of God

Feast Or Famine

According to a recent study by Stanford University, it takes hearing something seven times in order to form an opinion. It takes an additional seven times to internalize what's heard. A person must hear a truth eleven times in order to change a false conception.

It's so important to read the "inspired" word preached. Romans 10:17 "So then faith cometh by hearing, and hearing by the word of God."

Ask yourself today, is it "Feast or famine?"

Mrs. McDowell Celebrates 80th Birthday

Barbara Smith McDowell celebrated her 80th birthday with several relatives and friends on July 4th at Nell and Jim Gilmer's lakehouse in the Curtis Community. Homemade ice cream, cake, fruit, and watermelon were enjoyed by all. The guests pinned money to a money tree which was presented to her at the party.

Out-of-town guests included her sister, Ida Liles, and husband from Brewton, and several nieces and nephews: Alice and Jerry Thrasher, Alex, Andrew, Fayetteville, North Carolina; Judy and Guy Brower, Sarasota, Florida; Ginger and Rob Ward and Kendall, Opp; Greg Johnson, London, England; Nell and Jim Gilmer, and James, Albany, Georgia; Ron Gilmer, Winston-Salem, North Carolina; and Bill Gilmer, Florence, South Carolina.

Mrs. McDowell

CARD OF THANKS

D., pastor of First Baptist Church, Opp, Alabama, will be the evangelist, and Rev. Matt Mitchell will direct the music. The Sunday service will be at 6:00 p.m., and the weekday services will be at 7:00 p.m.

Dr. Hugh Tobias

New Ebenezer Baptist Church To Have Revival Services

New Ebenezer Baptist Church (Unit) will have revival services beginning Sunday, July 19 through Wednesday, July 22. Johnny Padalino, pastor of the Basin Baptist Church, will be bringing the message.

Services will be Sunday at 11:00 a.m. and 6:00 p.m. and Monday through Wednesday night services will be at 7:00 p.m. Everyone is invited to attend.

How Did We Get Our Bible?

The Bible was originally communicated through inspired men by the Holy Spirit. David said the Lord's Word was upon his tongue (2 Sam. 23:2-24). The apostles were guided into all truth (John 16:13). Paul said that the message he preached was not from man but by revelation from Christ (Gal. 1:11-12). Peter said inspired men spoke from God, being moved by the Holy Spirit (2 Peter 1:21).

These words were not the words of men's wisdom but words of the Holy Spirit (1 Cor. 2:13). They were not the commands of men but of the original, several others from the third, fourth, and fifth centuries. Extremely ancient translations of the New Testament have been found which are even earlier than the major manuscripts. Besides manuscripts and version, another source for reconstructing the original New Testament is early quotations from Christians, who copied in their writings the verbatim of the Bible from the early second century onward. Two famous language scholars, Dr. Westcott and Hort, said that besides minor trivialities, the words still subject to doubt were "a thousandth part of a whole." The Bible is easily the world's most accurately preserved book. Jesus' words have not passed away.

ESJC Announces Scholarship Winners

Stacy Nunn

Elba High School graduate, Stacy Nunn, received the Gladys Clark Scholarship through the ESJC Foundation to attend Enterprise State Junior College in the fall. This scholarship, presented by Miss Clark, is awarded annually to a graduate of a Coffee County high school. Miss Clark was a Coffee County Circuit Clerk for 36 years. In giving the scholarship, Miss Clark expressed her appreciation to the people of Coffee County for their devoted support during her years in office. Stacy, the daughter of Dwight Nunn and Dorothy Bechtold, plans to major in pharmacy.

Tommy Young

Elba High School graduate, Tommy Young, received an academic scholarship to attend Enterprise State Junior College in the fall. Tommy is the son of Harry Young. He plans a career in medicine.

Yulanda Caldwell

Yulanda Caldwell, daughter of Zelma and Jossie Caldwell, received an academic scholarship to attend Enterprise State Junior College in the fall. The Elba High School graduate plans to major in occupational therapy.

Taylor Reunion Held Recently In Virginia

The children of Pine and Bonnie Taylor held their annual family reunion on the campus of Randolph-Macon College in Ashland, Virginia, with Jean and Ladell Payne as hostesses.

Also in attendance were sixteen grandchildren, their spouses and nineteen great-grandchildren: Larry Mayo, San Antonio, Texas; Patty Grant, Spanish Fort, AL; Linda Henderson and son, Joseph, Dauphin Island, AL; Mike Mayo, Washington, D. C.; Marilyn and Greg Liles and their children, Becky and Samuel, Hartselle, AL; Paula and Danny King and children, Amy and Lori, Opelika, AL; Judy and Jimmy Mays and daughter, Melanie, Richardson, TX; Nancy and Dale Crowe and children, Leah, Emily, Laura and Katie, Elba, AL; Al and Tina Wright and children, Kaki and Trey, Dothan, AL; Dianne and Jeff Domowitz and foster daughter, Ellic, Falls Church, VA; Peter and Jodie Farrell and son, Matthew, Arlington, VA; Kathy and Bill Dyess, Fairfax, VA; Christa Ann Clark, Hattisburg, Mississippi; Lisa Payne, Los Angeles, California; Jenny Payne, Richmond, VA; Lynn and Mike Sutt and children, Lindsey and Wesley, Jonesboro, Arkansas; Mark and Winnie Farro and children, Taylor and Molly, Birmingham, AL; and one guest, Brian Chopskie, Richmond, VA.

Attending were eight Taylor children and their spouses including Lucille Mayo, Daphne, Alabama; Ed and Louise Taylor, Orlando, Florida; Elmer and Grace Taylor, Elba, AL; Annie Laurie and Audrey Wright, Atmore, AL; Oleene Farrell, Wash-

HWY. 84 East • Enterprise

An auction for the public where you can buy
and sell anything of value.
We are now taking consignments for this sale.

This is an excellent opportunity for military and civilians alike, moving in or out of our community to liquidate merchandise you don't need or buy items you might need, so check your home, shop, storage building, or you may even be paying rent on storage for items wasting away that you could turn into cash. In addition to any automobile, truck, van, boat, motorcycle, or recreational vehicle you would like to sell, we would particularly like to solicit items such as shop equipment, office equipment, lawn and garden equipment, or home appliances you no longer need. If you would just like to turn your merchandise into cash, we have a line of buyers that will buy anything of value if it is priced right.

For details call 205-347-4302 and ask for
Phillip or Paul.

Pick up service is available within the Enterprise City Limits.
SALES ARE 1st AND 3rd SAT. OF EACH MONTH

Are you satisfied with the interest rate you receive on your savings ?

If not, call and compare!

NEWS WITH ANGELA

Angela C. Hughes - County Agent

Tips On Paint Selection

Do you often find yourself confused with the different types of paints available? There are so many to choose from: high-gloss, semi-gloss, and flat-coming in both latex and alkyl. Because the success of your painting project depends on proper product selection, you should know the differences between these types of paints and on what surfaces to apply them.

Top coats come in high-gloss, semi-gloss, and flat. High gloss is the most durable and also has the highest degree of sheen. Semi-gloss has less sheen than high gloss, is more durable than flat, and is formulated for kitchens and baths-areas that require frequent cleaning. Flat paint absorbs light and is extremely subtle, and while not as abrasion-resistant as the others, flat paint is recommended in areas such as living rooms and dining rooms.

As for paint types, there are alkyl and latex. Latex, which is water-thinned, is popular because cleanup is easy-just rinse with soap and water. Latex paint is more subtle than alkyl paint, and is recommended on drywall surfaces-areas such as living rooms and dining rooms.

Alkyl, solvent thinned, paint has been traditionally recommended in "high-traffic" areas such as kitchens and baths and requires cleanup with paint thinner or mineral spirits. But now, extra durability and cleanup ease have been combined with the beauty of high-gloss latex paint. The benefits are high shine with the soap and water cleanup characteristic of latex paint.

A knowledge of the basic types of paint, together with thorough surface preparation, will ensure a successful long-lasting paint job.

Summer Woollens

Did you know that wool represents a wonderful choice for spring and summer fashions? Wool is a natural fiber that not only keeps you warm in the winter, but also keeps you cool in summer.

People often associate wool with warmth; however, wool can be woven into lightweight fabrics, such as worsted, and will pull moisture away from the body thereby providing coolness. Summer wool also resists the typical wrinkles you get with summer fabrics made of linen and cotton fibers. Today, wool is used in men's suits for the summer season.

Grass Control In Peanuts

Richard Petcher - Assistant County Agent

Grass Control In Peanuts

There is still a good bit of crabgrass, buffalograss, and goosegrass in many peanut fields. Most often this is just on the top of terraces or in certain sections of your peanut fields.

Post Plus at 1 1/2 pints plus a good oil concentrate at 2 pints is the recommended control for these annual grasses. Normally, Post Plus is recommended to be sprayed on much smaller grasses, but this year I am seeing good control on these grasses at much larger stages of growth. A crop oil concentrate must be added to the spray mix for good grass control.

Do not mix Post with any other pesticide additive or fertilizer as this diminishes the activation of the Post. Post does not control broadleaf weeds or nutgrass. Post needs an ample amount of spray water. You should use a spray volume of 20 gallons per acre.

Volunteer Peanuts

Just a reminder for our peanut growers to disk under your volunteer peanuts that have come up in rye, wheat, and oat fields or fallow

ground. As you know, allowing these peanuts to grow ruins your rotation and these volunteer peanuts host the same nematodes, insects and diseases as our regular peanut crop. So be sure to get this disked under when your schedule frees up.

Mixing Bravo With Other Chemicals

A question I am often asked is, "Can I mix my Bravo spray with different herbicides?"

Spraying Bravo with a herbicide could save an extra trip across your fields, but in some cases it just makes for extra problems. As a general rule of thumb, you should never add Bravo to a herbicide that requires crop oil. One of the main chemicals that you can add Bravo to is 2,4-D. If you do not add an oil to this mix, you can also add Bravo to your Classic spray as long as there is no sulfur in the Bravo. The herbicides that you would not want to mix Bravo with are Starfire, Blazer, Basagran, Poast, or Poast Plus. When mixing your tank mix, it is best to first mix your herbicide and then add your Bravo.

The herbicides that you would not want to mix Bravo with are Starfire, Blazer, Basagran, Poast, or Poast Plus. When mixing your tank mix, it is best to first mix your herbicide and then add your Bravo.

Tips On Canning Tomatoes

Sandra Coffey - County Agent

Canning Tomatoes

Tomatoes are really plentiful in Coffee County this year. We are getting a lot of phone calls on canning tomatoes. It is important that you remember we no longer recommend the cold or raw packing method of canning tomatoes. Be sure to process in a waterbath canner.

Tomatoes (hot pack). Use firm, red, ripe tomatoes. Wash, peel, core, and cut them into quarters. Heat to boiling and pack hot. Add 1 teaspoon salt per quart. You can add 1/4 teaspoon citric acid USP grade to each pint (1/2 teaspoon per quart) to lower the pH level. Add it after filling jars about half full. Adjust jar lids and bands.

Process in a boiling waterbath canner (212 degrees F.) pint jars, 35 minutes; quart jars, 45 minutes.

Tomato juice. Avoid delay at any stage of the procedure. To retain natural flavor and color of tomato in the canned juice, use a stainless steel knife. Do not use copper, brass, or iron utensils.

Use only red, ripe, firm tomatoes, preferably of bright color. Discard any with green, moldy, or decayed portions. Wash tomatoes and remove cores. Cut into small pieces. Simmer until softened. Do not boil for this causes tomato juice to separate and also to lose vitamin C. Put hot tomatoes at once through a fine sieve. Heat juice to simmering temperature. Pour into containers to within 1/2 inch of top. Add 1 teaspoon salt to each quart (1/2 teaspoon to each pint). You can add 1/4 teaspoon citric acid USP grade to each pint (1/2 teaspoon per quart) to lower the pH level. Add it after filling each jar about half full. Adjust jar lids and bands.

Process in a boiling waterbath canner (212 degrees F.) pint and quart jars, 35 minutes.

Hot Chile Salsa (about 7 pint jars)
5 pounds tomatoes
2 pounds chile peppers
1 pound onions, chopped
1 cup vinegar
3 teaspoons salt
1/2 teaspoon pepper

Hot Pack
To prepare chile peppers - wear rubber gloves while handling chiles or wash hands thoroughly with soap and water before touching your face. Wash and dry chiles. Slice each pepper on its side to allow steam to escape. Peel peppers using one of the following methods.

Oven or broiler method: Place chiles in oven (400 F) or broiler for 6 to 8 minutes until skins blister.

Range-top method: Cover hot burner, either gas or electric, with heavy wire mesh. Place chiles on burner for several minutes until skins blister.

Allow peppers to cool. Place in a

Scholarships Are Available At ESJC

Displaced homemakers and single parents are invited to apply for a Job Skills Development Scholarship for full quarter at Enterprise State Junior College. The one-time award will cover tuition and matriculation fees for one five-hour class. Students should be enrolled in one of ESJC's career certificate or degree programs. Applications are available in the Continuing Education Office, Administration Building, and must be submitted by August 3. Call 393-ESJC, ext. 218, to receive additional information.

Flea Control On Pets

Stan Windham - County Agent

We have had several calls into the Extension office concerning fleas in the yard and fleas in the house, but one of the main areas of concern this year has been suffering by pets related to fleas, particularly dogs and cats. This can also become a problem not only for your pets but also for you, particularly if you let the pet into the house. Once fleas get started, they can become a bigger and bigger problem because they hatch out so fast.

There are many products on the market that you can use to treat your dogs and cats for fleas. I want to talk about some that I feel are fairly inexpensive and a fairly good way to help you pet have a more comfortable summer. One product is some of the pyrethrin sprays. These are generally an aerosol spray. Your veterinarian, grocery stores, feed and seed type stores all probably have some form of a pyrethrin spray. You can also use Sevin 5% dust on your dog or cat. Also, Malathion makes a 5% dust that is equally as effective. The only word of caution I might add is I would not use Sevin or Malathion on dogs or cats that are less than one month old.

There are three products on the market that you may pick up if you are a cat owner thinking you can use them on your cat, but they are labeled only for dogs and I want to draw your attention to those. One product is called ProSpot. It will come as a 5.6

or 13.8 percent solution. This is only for dogs. Another product is Lindane 20 percent solution. This is only to be used on dogs. Two other products with the same active ingredient are Coopers and Expar which are products for fleas that are only for dogs. Some other over-the-counter products you can buy to use on dogs or cats are Delmar or Deltic. Both of these have the same active ingredient. Others are Rabon, Limonene, and Sendran 50 WP. All of these will work very well on dogs or cats for flea control.

One other form of flea control is the collars or tags. These can be used on dogs or cats. The collars or tags contain dichlorvos. The only word of caution on the collar is to make sure it fits properly, not restricting the animal. You would want to watch for any possible skin reaction from the collar. I would not use a collar along with another insecticide because you could overdose the animal which would most likely not kill but would make it sick. Another note of caution would be to not put a collar on a sick animal. This would give a constant low level dose of insecticide.

If you have any further questions concerning flea control on your pets in your yard or any other insect problem type questions, we will be glad to help you out. Give us a call at the Extension office at 894-5596, and we will do our best to answer your questions.

ESJC Announces Scholarship Winners

Stacy Nunn

Elba High School graduate, Stacy Nunn, received the Gladys Clark Scholarship through the ESJC Foundation to attend Enterprise State Junior College in the fall. This scholarship, presented by Miss Clark, is awarded annually to a graduate of a Coffee County high school. Miss Clark was a Coffee County Circuit Clerk for 36 years. In giving the scholarship, Miss Clark expressed her appreciation to the people of Coffee County for their devoted support during her years in office. Stacy, the daughter of Dwight Nunn and Dorothy Bechtold, plans to major in pharmacy.

Tommy Young

Elba High School graduate, Tommy Young, received an academic scholarship to attend Enterprise State Junior College in the fall. Tommy is the son of Harry Young. He plans a career in medicine.

Yulanda Caldwell

Yulanda Caldwell, daughter of Zelma and Josie Caldwell, received an academic scholarship to attend Enterprise State Junior College in the fall. The Elba High School graduate plans to major in occupational therapy.

Taylor Reunion Held Recently In Virginia

The children of Pine and Bonnie Taylor held their annual family reunion on the campus of Randolph-Macon College in Ashland, Virginia, with Jean and Laddell Payne as hostesses.

Family members began arriving on Thursday and were taken to their assigned dormitory rooms. All meals were eaten in the college cafeteria. Friday offered several activities such as sightseeing in Washington, D.C., or Williamsburg, VA, golfing, a visit to the Science Museum in Richmond or just visiting and catching up on family news. A special dinner was served Friday evening, followed by a time of sharing old family stories and watching a special video prepared by Steve Clark from old family photos. On Saturday all family members were treated as special guests to a day at King's Dominion, a large amusement and water park. The evening ended with a laser light and fireworks show, celebrating July 4th. Sunday morning started with an early breakfast as family members said their goodbyes and started home.

Attending were eight Taylor children and their spouses including Laddell May, Daphne, Alabama; Edd and Louise Taylor, Orlando, Florida; Elmer and Grace Taylor, Elba, AL; Annie Laurie and Aubrey Wright, Almore, AL; Olenne Farrell, Wash- ington, D.C.; Frances Bannan, West Chester, Pennsylvania; Jean and Laddell Payne, Ashland, Virginia; Annette and Harold Farris, Many, Louisiana.

Also in attendance were sixteen grandchildren, their spouses and nineteen great-grandchildren: Larry Mayo, San Antonio, Texas; Patty Grant, Spanish Fort, AL; Linda Henderson and son, Joseph, Dauphin Island, AL; Mike Mayo, Washington, D.C.; Marilyn and Greg Liles and their children, Becky and Samuel, Hartselle, AL; Paula and Danny King and children, Amy and Lori, Opelika, AL; Judy and Jimmy Mays and daughter, Melanie, Richardson, TX; Nancy and Dale Crowe and children, Leah, Emily, Laura and Katie, Elba, AL; Al and Tina Wright and children, Kaki and Trey, Dothan, AL; Dianne and Jeff Domowitz and foster daughter, Ellie, Falls Church, VA; Peter and Jodie Farrell and son, Matthew, Arlington, VA; Kathy and Bill Dyess, Fairfax, VA; Christa Ann Clark, Hattiesburg, Mississippi; Lisa Payne, Los Angeles, California; Jenny Payne, Richmond, VA; Lynn and Mike Sutt and children, Lindsey and We-lev, Jonesboro, Arkansas; Mark and Winnie Farris and children, Taylor and Molly, Birmingham, AL; and one guest, Brian Chopskie, Richmond, VA.

Angela C. Hughes - County Agent

Tips On Paint Selection

Do you often find yourself confused with the different types of paints available? There are so many to choose from: high-gloss, semi-gloss, and flat-coming in both latex and alkyd. Because the success of your painting project depends on proper product selection, you should know the differences between these types of paints and on what surfaces to apply them.

Top coats come in high-gloss, semi-gloss, and flat. High gloss is the most durable and also has the highest degree of sheen. Semi-gloss has less sheen than high gloss, is more durable than flat, and is formulated for kitchens and baths—areas that require frequent cleaning. Flat paint absorbs light and is extremely subtle, and while not as abrasion-resistant as the others, flat paint is recommended in areas such as living rooms and dining rooms.

As for paint types, there are alkyd and latex. Latex, which is water-thinned, is popular because cleanup is easy—just rinse with soap and water. Latex paint is more subtle than alkyd paint, and is recommended on drywall surfaces—areas such as living rooms and dining rooms.

A knowledge of the basic types of paint, together with thorough surface preparation, will ensure a successful long-lasting paint job.

Summer Wooleens

Did you know that wool represents a wonderful choice for spring and summer fashions? Wool is a natural fiber that not only keeps you warm in the winter, but also keeps you cool in summer.

People often associate wool with warmth; however, wool can be woven into lightweight fabrics, such as worsted, and will pull moisture away from the body thereby providing coolness. Summer wool also resists the typical wrinkles you get with summer fabrics made of linen and cotton fibers. Today, wool is used in men's suits for the summer season.

Richard Petcher - Assistant County Agent

Grass Control In Peanuts

There is still a good bit of crabgrass, buffalograss, and goosegrass in many peanut fields. Most often this is just on the top of terraces or in certain sections of your peanut fields.

Post Plus at 1 1/2 pints is a good oil concentrate at 2 pints is the recommended control for these annual grasses. Normally, Post Plus is recommended to be sprayed on much smaller grasses, but this year I am seeing good control on these grasses at much larger stages of growth. A crop oil concentrate must be added to the spray mix for good grass control.

Do not mix Post with any other pesticide additive or fertilizer as this diminishes the activation of the Post. Post does not control broadleaf weeds or nutgrass. Post needs an ample amount of spray water. You should use a spray volume of 20 gallons per acre.

Volunteer Peanuts

Just a reminder for our peanut growers to look under your volunteer peanuts that have come up in rye, wheat, and oat fields or fallow.

Tips On Canning Tomatoes

Sandra Coffey - County Agent

Canning Tomatoes

Tomatoes are really plentiful in Coffee County this year. We are getting a lot of phone calls on canning tomatoes. It is important that you remember we no longer recommend the cold or raw packing method of canning tomatoes. Be sure to process in a waterbath canner.

Tomatoes (hot packs). Use firm, red, ripe tomatoes. Wash, peel, core, and cut them into quarters. Heat to boiling and pack hot. Add 1 teaspoon salt to each quart. 1/2 teaspoon citric acid USP grade to each pint (1/2 teaspoon per quart) to lower the pH level. Add it after filling each jar about half full. Adjust jar lids and bands.

Process in a boiling waterbath canner (212 degrees F.) pint jars, 35 minutes; quart jars, 45 minutes. Tomato juice. Avoid adding at any stage of the procedure. To retain natural flavor and color of tomato in the canned juice, use a stainless steel knife. Do not use copper, brass, or iron utensils.

Use only red, ripe, firm tomatoes, preferably of bright color. Discard any with green, moldy, or decayed portions. Wash tomatoes and remove cores. Cut into small pieces. Simmer until softened. Do not boil for this causes tomato juice to separate and also to lose vitamin C. Put hot softened tomatoes at once through a fine sieve. Heat juice to simmering temperature. Pour into containers to within 1/2 inch of top. Add 1 teaspoon salt to each quart, 1/2 teaspoon to each pint. You can add 1/4 teaspoon citric acid USP grade to each pint (1/2 teaspoon per quart) to lower the pH level. Add it after filling each jar about half full. Adjust jar lids and bands.

Process in a boiling waterbath canner (212 degrees F.) pint and quart jars, 35 minutes.

Hot Chile Salsa (about 7 pint jars)
5 pounds tomatoes
2 pounds chile peppers
1 pound onions, chopped
1 cup vinegar
3 teaspoons salt
1/2 teaspoon pepper

Hot Pack
To prepare chile peppers - wear rubber gloves while handling chiles or wash hands thoroughly with soap and water before touching your face. Wash and dry chiles. Slice each pepper on its side to allow steam to escape. Peel peppers using one of the following methods.

Oven or broiler method: Place chiles in oven (400 F.) or broiler for 6 to 8 minutes until skins blister. Range-top method: Cover hot burner, either gas or electric, with heavy wire mesh. Place chiles on burner for several minutes until skins blister.

Allow peppers to cool. Place in a

TOWN RECEIVES FUNDS FOR REHABILITATION PROGRAM

New Brockton to get facelift soon

by Marvin McLain
Editor

The Town of New Brockton will soon begin a housing rehabilitation project within the Frizzimmons North John/North Railroad Street Target Area.

Approximately 30 low and moderate income housing units will benefit from the housing activities that will take place in the coming weeks.

The program is estimated to cost \$330,000.00 with \$300,000.00 coming from the Community Development Block Grant funds. The remaining \$30,000.00 will be injected in local match funds by the homeowners.

The project will be implemented on a 90/10 cost share basis with 90% of the associated rehabilitation costs to be injected by way of grant assistance and the remaining 10% being injected by the owner.

City Clerk Linda Dillow stated, "Priority rehabilitation needs that will be addressed during implementation of this program include basic

rehabilitation needs, such as plumbing, wiring, heating, insulation, painting, roofing, underpinning; and more extensive needs, such as doors, windows, structural deficiencies, exterior porches, exterior siding, etc."

A rating system will be designed that will hopefully allow the town to utilize CDBG funds in a manner that will assure protection of the federal investment.

A "neediness or care of the structure" analysis will provide bonus points in the rating process in an effort to assure that the structure will be cared for following rehabilitation.

The town will make a concerted effort to rehabilitate units that will, when upon completion, be preserved for LMI (Low/Moderate Income) occupancy for the next 10-15 year period and thus will not attempt to expand CDBG funds on units whose conversion to standard constitutes a "stop-gap" short term eradication of slum and blighting influences.

The rating system will attempt to give preference to income eligible families while not discriminating against elderly applicants.

In the case of renter-occupied units, the qualifications of the occupant will be considered for rating purposes.

For eligibility purposes, the following income limits will be adhered to unless updated limits are provided prior to the implementation of the rehabilitation activity:

1 PERSON - \$16,600.00
2 PERSONS - \$18,950.00
3 PERSONS - \$21,300.00
4 PERSONS - \$23,700.00
5 PERSONS - \$25,550.00
6 PERSONS - \$27,450.00
7 PERSONS - \$29,350.00
8 PERSONS - \$31,250.00

Mayor Jim Driskell has stated notification of when to submit applications for the program will be hand delivered to each resident within the targeted area.

Driskell said, "In 1993, he hopes the town will be approved and a new targeted area will receive the same type renovation."

HOW ARE YOU TODAY PROGRAM AVAILABLE

Computer checks on shut-ins and elderly

by Marvin McLain
Editor

How are you today? Sounds simple doesn't it? But to someone who lives alone, these words can be very meaningful and important.

Last week, several Elba residents heard about a service that's available to individuals who are shut-ins or live alone.

Phillip Walton of Enterprise provides a monitoring service called Compu-Talk "How Are You Today?"

Walton said that a computer with a voice card will call and check in on the elderly or homebound as often as they wish for it to do so.

"One, two or three times a day, our computer will call the telephone number you give us at the times you tell us to call," said Walton.

Walton said that he first became aware of the need for such a service while delivering papers on his rural paper route.

"I personally didn't know that there were so many elderly people living alone and also others who were confined to walkers and wheelchairs," Walton said.

"I didn't realize that there were so many needy people around who needed help. This is when I came up with this idea of a service that would check on people like this."

He played a recording for the group which presented a sample call that would be received by those individuals who have the service.

Walton explains to group how crisis monitoring system works

When the phone rings, a computer voice will say, "Hello, this is the 'How Are You Today?' computer monitoring service. We are calling to check on Mrs. Smith at 123 Main Street. If you are OK, please dial a 1 on your touch tone phone now. If you are not OK, please dial 0 on your touch tone phone, and we will immediately alert the proper people of this situation. Thank you and have a nice day."

Walton went on to explain that if the telephone is picked up and no answer, the computer will call back.

If when a number is called and there is no answer after 10 rings, the computer will in turn call the two or three help numbers that have been provided by the person receiving the service. This is done automatically every day.

When the computer calls a help number the following message is given to the individual answering the phone. "Hello, this is the 'How Are You Today?' computer monitoring service calling to alert you that Mrs. Smith of 123 Main Street has failed to respond to all of our calls during this day. Please check on this person. This person may be in need of your assistance."

Walton also added that help numbers will also be called if the phone remains busy for a long period of time or if the phone line is dead.

The steadily decreasing student load has enabled students flying the Night 1 period from about 8 to 11:30 p.m., and Night 2, from midnight to 4 a.m., to be combined into the Night 1 period, eliminating the early morning flights.

"We can handle all the students in Night 1 without negatively affecting training, which in turn saves money," said Capt. Michael D. Proulx, assistant training officer of the Aviation Training Brigade. He added that, as a result of the elimination of the late-night flights, a \$360,000 savings in annual contractor expenses and \$1,776 per month in reducing costs will be realized.

Post officials say that an added benefit of the reduction is its impact on the post's "Fly Neighborly Program."

Fly Neighborly is a national, voluntary noise-reduction program in which civil, military and government helicopter pilots try to reduce or eliminate noise pollution through operator awareness, training and indoctrination, flight operations planning and sensitivity to community concerns.

Controlling noise levels protects the health and welfare of soldiers and civilians living either on post or within surrounding communities.

According to Branton W. Snowden of the Airfield and Airspace Branch, Aviation Division, Directorate of Plans, Training, Mobilization and Security, during the past three years, there has been a steady decline in noise complaints.

"We've had a dramatic change in the number of noise complaints after midnight recently," he said.

Folmar names Morgan new Assistant DA

District Attorney Joel M. Folmar has appointed Bryan Earl Morgan as a full-time Assistant District Attorney for the Twelfth Judicial Circuit.

Morgan will begin his duties for the Circuit on July 27, 1992. Although Morgan will have circuit-wide responsibilities, he will be primarily assigned to the Enterprise Division - Coffee County.

In making the announcement, Folmar said, "I have been impressed with Bryan's work in his capacity as Executive Director of the Office of Prosecution Services."

Folmar continued stating, "Bryan's background and experience will be an asset to the people of Coffee and Pike Counties."

For the past five years Morgan has served as Executive Director for the State of Alabama, Office of Prosecution Services which provides administrative support for the district attorneys in the state.

He also served as legal advisor to former Governor George C. Wallace from 1983 until 1987, after having practiced law in Birmingham.

Morgan received his juris doctorate degree from Cumberland School of Law in Birmingham in 1981. While in school, he received the Corpus Juris Secundum Award and an appreciation award by the Alabama Coalition Against Domestic

Violence.

He is a member of the Alabama Bar Association, American Bar Association and the National District Attorney Association. Morgan also serves with the Judge Advocate General's Corps of the Alabama National Guard.

Morgan is a native of Birmingham, Alabama and is the son of the late Earl C. Morgan, former District Attorney for Jefferson County. He is married to the former Karen Wurtz of Dothan.

About his appointment, Morgan commented, "I appreciate the confidence the District Attorney has placed in me and look forward to working with all law enforcement and court officials."

Folmar said that many times progress brings with it change, and with change, there is often loss.

With the appointment of Morgan as a full-time Assistant District Attorney, the use of part-time Assistant District Attorneys in the 12th Judicial Circuit will no longer be necessary.

For the past 11 years, Danny Carmichael and Mark Fuller have assisted in meeting the demands of prosecuting services in Coffee County.

Folmar announced that because of court schedules, increasing complexity of cases and the amount of

BRYAN MORGAN

pre-trial preparation being required, he and other District Attorneys across the state are no longer able to meet the demands with part-time assistants.

He expressed his regret over losing Carmichael and Fuller and stated that both had done an excellent job.

Malcom Davis seeking District 3 seat on Elba City Council

Malcom Davis has qualified to run for councilman in Elba's upcoming municipal election.

Davis is seeking election to the council to represent the residents of District 3 in the City of Elba.

Davis is a lifelong resident of Coffee County and has lived in Elba for the past 20 years.

He is a business man and was with the Elba Tractor Company from 1963 until 1989.

"I retired in 1989 and I am able to be a full-time councilman and work for the people of Elba," said Davis.

Davis served on the Elba City Council in the 80's when he was appointed to fill the unexpired term of Robert Stephens. Stephens was appointed to the Coffee County Commission to fill a vacancy on that board.

Davis faces Earl McCollough for the District 3 seat on the council in the August 25th election.

** HAPPENINGS **

YOUNG WOMAN OF THE YEAR Nine of Coffee County's most outstanding senior girls will be vying for the title of Coffee County Young Woman of the Year. The event is scheduled for Saturday, July 25th, at 7:00 p.m. and will be held in the Enterprise High School Auditorium.

NEW BROCKTON ATHLETIC CLUB will be meeting Thursday (today), July 23, at 7:00 p.m. The meeting will be held in the New Brockton High School.

MUNICIPAL ELECTION The municipal elections, Elba, New Brockton, Kinston and Enterprise, will be held on Tuesday, August 25.

WRECK INJURES 2... On Tuesday at approximately 8:30 a.m., a 34-ton, 1974 Ford truck, pulling a livestock trailer left the road and struck a pine tree. Injured in the accident were passengers Ricky Carr, age 21, and Gary Carr, age 8, both of Route 4, Enterprise, AL. The driver of the vehicle, Richie Lee Carr, also of Route 4, Enterprise, was uninjured in the incident. Units of the Elba Fire Department and the Elba Rescue Squad responded to the scene. The two injured individuals were transported to Elba General Hospital by the rescue squad where they were treated and later released. Investigating the accident was Officer Johnny Kinn of the Elba Police Department. The accident occurred on East Davis Street (U.S. Hwy. 84E) just past the AL Hwy. 875 intersection.
